CONTENTS OF VOLUME 129

Number 1, 25 March 1979

Bowden, D. W. and Calendar, R., Maturation of Bacteriophage P2 DNA *in Vitro*: A Complex, Site-specific System for DNA Cleavage . . . 1

Williams, J. G. and Lloyd, M. M., Changes in the Abundance of Polyadenylated RNA During Slime Mould Development Measured Using Cloned Molecular Hybridization Probes 19

Cohen, R. J. and Benedek, G. B., The Functional Relationship between the Polymerization and Catalytic Activity of Beef Liver Glutamate Dehydrogenase III. Analysis of Thusius' Critique 37

Cheetham, R. C., Huehns, E. R. and Rosemeyer, M. A., Participation of Haemoglobins A, F, A_2 and C in Polymerisation of Haemoglobin S . 45

Appendix: Rosemeyer, M. A. 59

Dohme, F. and Fahnestock, S. R., Identification of Proteins Involved in the Peptidyl Transferase Activity of Ribosomes by Chemical Modification 63

Jones, M. McD. and Steinhardt, J., Thermodynamic Study of the Crystallization of Sickle-cell Deoxyhemoglobin (Hemoglobin S Solubility/Saturation Concentration/Enthalpy of Crystallization/Entropy of Crystallization) 83

Bernardi, F., Saghi, M., Dorizzi, M. and Ninio, J., A New Approach to DNA Polymerase Kinetics 93

Pérez, S., Roux, M., Revol, J. F. and Marchessault, R. H., Dehydration of Nigeran Crystals: Crystal Structure and Morphological Aspects . . 113

Mandelkow, E-M. and Mandelkow, E., Junctions Between Microtubule Walls 135

Letters to the Editor

Hunt, S., Fraser, R. D. B., MacRae, T. P. and Suzuki, E., Molecular Organization in Molluscan Operculae 149

Leonard, K. R. and Lake, J. A., Ribosome Structure: Hand Determination by Electron Microscopy of 30 S Subunits. 155

Berliner, L. J. and Bauer, R. S., Structural Changes Within Unit Cell Subunits in Crosslinked α-Chymotrypsin Crystals 165

Schreier, P. H. and Cortese, R., A Fast and Simple Method for Sequencing DNA Cloned in the Single-stranded Bacteriophage M13 . 169

Announcements 173

NUMBER 2, 5 APRIL 1979

BALDWIN, J. and CHOTHIA, C., Haemoglobin: The Structural Changes Related to Ligand Binding and its Allosteric Mechanism 175

LEE, G. T-Y. and ENGELHARDT, D. L., Peptide Coding Capacity of Polysomal and Non-polysomal Messenger RNA During Growth of Animal Cells . 221

CREIGHTON, T. E., Electrophoretic Analysis of the Unfolding of Proteins by Urea 235

Appendix 258

ANDO, T. and ASAI, H., Conformational Change in Actin Filament Induced by the Interaction With Heavy Meromyosin: Effects of pH, Tropomyosin and Deoxy-ATP 265

ANNOUNCEMENT 681

Index to Volume 129

Actin filament bundles from microvilli of sea urchin eggs, a study of their structure, 319
— —, conformational change induced by the interaction with heavy meromyosin: effects of pH, tropomyosin and deoxy-ATP, 265
Adenovirus 2 heterogeneous nuclear RNA, late, a study of its structure, 547
— type-2, late, transcription unit: termination is downstream from the last poly (A) site, 643
AIZAWA, S-I. (see also KAGAWA, H.), 333
Allosteric mechanism of haemoglobin ligand binding, a study of related structural changes, 175
AMOS, L. A. (see also SPUDICH, J. A.), 319
Anabaena flos-aquae, average thickness of the gas vesicle wall, 279
ANDO, T. & ASAI, H., Conformational change in actin filament induced by the interaction with heavy meromyosin: effects of pH, tropomysin and deoxy-ATP, 265
ARMSTRONG, R. E. (see also WALSBY, A. E.), 279
ASAI, H. (see also ANDO, T.), 265
ASAKURA, S. (see also KAGAWA, H.), 333
Assembly of bacteriophage lambda: isolation and characterization of groE host protein, 359
Assembly of bacteriophages: purification and properties of groE host protein, 375
Autoradiographic method, simple, for investigating long range chromosome substructure: size and number of DNA molecules in isolated nucleoids of *Escherichia coli*, 501
AXEL, R. (see also DEITRICH, A. E.), 587

Bacterial flagella filaments, moving, a micro-video study: passive rotation by hydrodynamic force *in vitro*, 305
Bacteriophage assembly: purification and properties of host protein groE, 375
— λ assembly: isolation and characterization of the host protein groE, 359
— —, transcription of the *int* gene; new RNA polymerase binding site and RNA start generated by *int*-constitutive mutations, 509
— M13 single-stranded cloned DNA sequencing, a fast and simple method, 169
— P2 DNA maturation *in vitro*: a complex, site-specific system for DNA cleavage, 1
BALDWIN, J. & CHOTHIA, C., Haemoglobin: the structural changes related to ligand binding and its allosteric mechanism, 175
BAUER, R. S. (see also BERLINER, L. J.), 165
BAUER, W. R. (see also CRICK, F. H. C.), 449
BAUER, W. R. (see also WANG, J. C.), 458
Beef liver glutamate dehydrogenase, the functional relationship between polymerization and catalytic activity; analysis of Thusius' critique, 37
Bence Jones protein Rhe, crystal structure (3 Å) and its unique domain-domain association, 657
BENEDEK, G. B. (see also COHEN, R. J.), 37
BERGET, S. M. & SHARP, P. A., Structure of late adenovirus 2 heterogeneous nuclear RNA, 547
BERLINER, L. J. & BAUER, R. S., Structural changes within unit cell subunits in crosslinked α-chymotrypsin crystals, 165
BERNARDI, F., SAGHI, M., DORIZZI, M. & NINIO, J., A new approach to DNA polymerase kinetics,93
BOWDEN, D. W. & CALENDAR, R., Maturation of bacteriophage P2 DNA *in vitro*: a complex site-specific system for DNA cleavage, 1
BUCKINGHAM, R. H. (see also VACHER, J.), 287

CALENDAR, R. (see also BOWDEN, D. W.), 1
CANTOR, C. R. (see also DEITRICH, A. E.), 587
Catalase from *Micrococcus luteus*, unit cell and space group, 675
Catalytic activity of beef liver glutamate dehydrogenase and its functional relationship to polymerization; analysis of Thusius' critique, 37
Chain conformation in the collagen molecule, 463
CHEETHAM, R. C., HUEHNS, E. R. & ROSEMEYER, M. A., Participation of haemoglobins A, F, A_2 and C in polymerisation of haemoglobin S, 45
CHOTHIA, C. (see also BALDWIN, J.), 175
Chromosome substructure, long range, investigated by a simple autoradiographic method: size and number of DNA molecules in isolated nucleoids of *Escherichia coli*, 501
Chromosomes, folded, in meiotic yeast cells: analysis of early meiotic events, 433

α-Chymotrypsin crystals, crosslinked, structural changes within unit cell subunits, 165
Cleavage of DNA, a complex, site-specific system; maturation of bacteriophage P2 DNA *in vitro*, 1
Cloned molecular hybridization probes and the measurement of changes in the abundance of polyadenylated RNA during slime mould development, 19
Cloning of DNA in the single-stranded bacteriophage M13, a fast and simple method for sequencing, 169
Coding, peptide, capacity of polysomal and non-polysomal messenger RNA during growth of animal cells, 221
Codon recognition by *Escherichia coli* $tRNA^{Leu}$ isoaccepting species determined by protein synthesis *in vitro* directed by phage RNA, 567
Cohen, R. J. & Benedek, G. B., The functional relationship between the polymerization and catalytic activity of beef liver glutamate dehydrogenase III. Analysis of Thusius' critique, 37
Collagen molecule chain conformation, 463
Conditional lethal mutation in an *Escherichia coli* strain with a longer chemical lifetime of mRNA, 343
Conformation of chains in the collagen molecule, 463
Conformational change in actin filament induced by the interaction with heavy meromyosin: effects of pH, tropomyosin and deoxy-ATP, 265
— changes of yeast valyl-tRNA synthetase and its interactions with RNAs, 483
Cortese, R. (see also Schreier, P. H.), 169
Cottam, G. L. (see also Waterman, M. R.), 337
Creighton, T. E., Electrophoretic analysis of the unfolding of proteins by urea, 235
— — Intermediates in the refolding of reduced ribonuclease A, 411
Crick, F. H. C., Wang, J. C. & Bauer, W. R., Is DNA really a double helix?, 449
Crosslink $S^4U(8)$-C(13), photochemical, effect on suppressor activity of su^+ $tRNA^{Trp}$ from *Escherichia coli*, 287
Crosslinked α-chymotrypsin crystals, structural changes within unit cell subunits, 165
Crystal structure of Bence Jones protein Rhe (3 Å) and its unique domain-domain association, 657
— — and dehydration of nigeran crystals, 113
Crystals of crosslinked α-chymotrypsin, structural changes within unit cell subunits, 165
Crystallization of sickle-cell deoxyhemoglobin, a thermodynamic study (hemoglobin S solubility/saturation concentration/enthalpy of crystallization/entropy of crystallization), 83
Crystallographic data for the DD-carboxypeptidase-endopeptidase of low penicillin sensitivity excreted by *Streptomyces albus* G, 677

Danson, M. J., Hale, G., Johnson, P., Perhan, R. N., Smith, J. & Spragg, P., Molecular weight and symmetry of the pyruvate dehydrogenase multienzyme complex of *Escherichia coli*, 603
Darnell, J. E., Jr (see also Fraser, N. W.), 643
DD-carboxypeptidase-endopeptidase of low penicillin sensitivity excreted by *Streptomyces albus* G, crystallographic data, 677
Dehydration of nigeran crystals: crystal structure and morphological aspects, 113
Deitrich, A. E., Axel, R. & Cantor, C. R., Salt-induced structural changes of nucleosome core particles, 587
Denaturation and renaturation do not affect the electrophoretic mobility of individual DNA topoisomers, 458
Deoxy-ATP, tropomyosin and pH, their effects on conformational change in actin filament induced by the interaction with heavy meromyosin, 265
Deoxyhemoglobin A_2, inhibitory effect on the rate of deoxyhemoglobin S polymerization, 337
— S polymerization rate, inhibitory effect of deoxyhemoglobin A_2, 337
—, sickle-cell, a thermodynamic study of its crystallization (hemoglobin S solubility/saturation concentration/enthalpy of crystallization/entropy of crystallization), 83
DNA of bacteriophage P2, maturation *in vitro*: a complex, site-specific system for DNA cleavage, 1
— cloned in the single-stranded bacteriophage M13, a fast and simple method for sequencing, 169
—, is it really a double helix?, 449
— molecules, size and number in isolated nucleoids of *Escherichia coli*; a simple autoradiographic method for investigating long range chromosome substructure, 501
—, nascent, from animal cells, and the presence of initiator RNA, 531
— polymerase kinetics, a new approach, 93
—, polyoma, replication in isolated nuclei: initiator RNA synthesis during nucleotide depletion, 393
— topoisomers, their electrophoretic mobility is unaffected by denaturation and renaturation, 458
Dideberg, O., Frère, J.-M. & Ghuysen, J.-M., Crystallographic data for the DD-carboxypeptidase-endopeptidase of low penicillin sensitivity excreted by *Streptomyces albus* G, 677

Dohme, F. & Fahnestock, S. R., Identification of proteins involved in the peptidyl transferase activity of ribosomes by chemical modification, 63
Domain-domain association, unique, and crystal structure (3 Å) of Bence Jones protein Rhe, 657
Dorizzi, M. (see also Bernardi, F.), 93

Echols, H. (see also Fischer, R.), 509
Eggs of the sea urchin, structure of actin filament bundles from their microvilli, 319
Electron density models, alternative, for structural biochemistry, 637
— microscopic studies of the mechanism of action of the restriction endonuclease of *Escherichia coli* B, 619
— microscopy of 30 S ribosome subunits: structure and hand determination, 155
Electrophoretic analysis of the unfolding of proteins by urea, 235
— mobility of individual DNA topoisomers is unaffected by denaturation and renaturation, 458
Eliasson, R. & Reichard, P., Replication of polyoma DNA in isolated nuclei VII. Initiator RNA synthesis during nucleotide depletion, 393
Endlich, B. (see also Rosamond, J.), 619
Engel, A. (see also Hohn, T.), 359
Engelhardt, D. L. (see also Lee, G. T-Y.), 221
Erickson, J. M. (see also Tseng, B. Y.), 531
Escherichia coli, a conditional lethal mutant with a longer chemical lifetime of mRNA, 343
— — B, electron microscopic studies of the mechanism of action of the restriction endonuclease, 619
— —, effect of photochemical crosslink $S^4U(8)$-C(13) on suppressor activity of su^+ $tRNA^{Trp}$, 287
— — nucleoids, isolated, size and number of their DNA molecules; a simple autoradiographic method for investigating long range chromosome substructure, 501
— — pyruvate dehydrogenase multienzyme complex, molecular weight and symmetry, 603
— — $tRNA^{Leu}$ isoaccepting species, specificity of their codon recognition determined by protein synthesis *in vitro* directed by phage RNA, 567

Fahnestock, S. R. (see also Dohme, F.), 63
Filament bundles of actin from microvilli of sea urchin eggs, a study of their structure, 319
Filaments of bacterial flagella, a micro-video study of their dynamic properties; passive rotation by hydrodynamic force *in vitro*, 305
Fischer, R., Takeda, Y. & Echols, H., Transcription of the *int* gene of bacteriophage λ: new RNA polymerase binding site and RNA start generated by *int*-constitutive mutations, 509
Flagella filaments, bacterial, a micro-video study of their dynamic properties; passive rotation by hydrodynamic force *in vitro*, 305
Folded chromosomes in meiotic yeast cells: analysis of early meiotic events, 433
Fraser, N. W., Nevins, J. R., Ziff, E. & Darnell, J. E., Jr, The major late adenovirus type-2 transcription unit: termination is downstream from the last poly(A) site, 643
—, R. D. B., Macrae, T. P. & Suzuki, E., Chain conformation in the collagen molecule, 463
—, — (see also Hunt, S.), 149
Frère, J.-M. (see also Dideberg, O.), 677

Gas vesicle wall, average thickness in *Anabaena flos-aquae*, 279
Ghuysen, J.-M. (see also Dideberg, O.), 677
Giegé, R. (see also Zaccaï, G.), 483
Glutamate dehydrogenase, beef liver, the functional relationship between polymerization and catalytic activity; analysis of Thusius' critique, 37
Goldman, E., Holmes, W. M. & Hatfield, G. W., Specificity of codon recognition by *Escherichia coli* $tRNA^{Leu}$ isoaccepting species determined by protein synthesis *in vitro* directed by phage RNA, 567
Goulian, M. (see also Tseng, B. Y.), 531
groE host protein invloved in bacteriophage assembly, purification and properties, 375
— — — — — — lambda assembly, isolation and characterization, 359
Growth of animal cells and the peptide coding capacity of polysomal and non-polysomal messenger RNA, 221
Guarente, L., Restoration of termination by RNA polymerase mutations is rho allele-specific, 295

Haemoglobin S polymerisation, participation of heamoglobins A, F, A_2 and C, 45
—: the structural changes related to ligand binding and its allosteric mechanism, 175

Hale, G. (see also Danson, M. J.), 603
Hand determination by electron microscopy of 30 S ribosome subunits, 155

Operculae, molluscan molecular organization, 149

P2 (see also Bacteriophage), 1
Parak, F. (see also Marie, A. L.), 675
Peptide coding capacity of polysomal and non-polysomal messenger RNA during growth of animal cells, 221
Peptidyl transferase activity of ribosomes by chemical modification, identification of proteins involved, 63
Pérez, S., Roux, M., Revol, J. F. & Marchessault, R. H., Dehydration of nigeran crystals: crystal structure and morphological aspects, 113
Perham, R. N. (see also Danson, M. J.), 603
Pettijohn, D. E. (see also Van Ness, J.), 501
pH, tropomyosin and deoxy-ATP, their effects on conformational change in actin filament induced by the interaction with heavy meromyosin, 265
Photochemical crosslink $S^4U(8)$-C(13), effect on suppressor activity of su^+ $tRNA^{Trp}$ from *Escherichia coli*, 287
Piñon, R., Folded chromosomes in meiotic yeast cells: analysis of early meiotic events, 433
Polyhooks, isolated, and their transformations, 333
Polyadenylated RNA, changes in its abundance during slime mould development measured using cloned molecular hybridization probes, 19
Polymerase for DNA, a new approach to its kinetics, 93
— — RNA, function and structure of subunits; regulation of RNA polymerase activity by stringent starvation protein (SSP), 517
— — —, new binding site and RNA start generated by *int*-constitutive mutations; transcription of the *int* gene of bacteriophage λ, 509
— — —, restoration of termination by mutations is rho allele-specific, 295

Polymerization of beef liver glutamate dehydrogenase and its functional relationship to catalytic activity; analysis of Thusius' critique, 37
— — deoxyhemoglobin S, inhibitory effect of deoxyhemoglobin A_2, 337
Polymerisation of haemoglobin S, participation of haemoglobins A, F, A_2 and C, 45
Polyoma DNA replication in isolated nuclei: initiator RNA synthesis during nucleotide depletion, 393
Polysomal and non-polysomal messenger RNA, peptide coding capacity during growth of animal cells, 221
Protein groE involved in bacteriophage assembly, purification and properties, 375
— — — — — lambda assembly, isolation and characterization, 359
— identification for the peptidyl transferase activity of ribosomes by chemical modification, 63
— Rhe, crystal structure (3 Å) and its unique domain-domain association, 657
—, stringent starvation, regulation of RNA polymerase activity, 517
— synthesis *in vitro* directed by phage RNA used to determine specificity of codon recognition by *Escherichia coli* $tRNA^{Leu}$ isoaccepting species, 567
— unfolding by urea, electrophoretic analysis, 235
Pyruvate dehydrogenase multienzyme complex of *Escherichia coli*, molecular weight and symmetry 603
